Ray,

I am following up on EPA's access request, related to our investigation of the Diamond Alkali Superfund Site, Lower Passaic River Study Area. Leena Raut, who has been working on this issue, is now on a detail so I will be pursuing this request.

I have reviewed your comments and will be discussing them with EPA Remedial Project Manager Eugenia Naranjo today. In particular, we will respond to your question about the gate, and Lockheed's pollution liability coverage. It appears to me that those the primary concerns at this point and I hope to get back to you this week. As I think Leena has mentioned, EPA is keen to move forward with this sampling event before winter, so we will be making every effort to wrap up our access discussions in October.

I look forward to working with you.

-Sarah

Subject: Clifton Access Agreement

Leena – here are revisions to the draft access consent. Our insurance contractor is still reviewing the Lockheed certificate. I thought there was a gap in their coverage (no environmental pollution coverage?) but I will wait for the experts to weigh in.

As you will see, I have narrowed the access area. If someone can explain exactly where the gate to the Givaudan cell is located, then we can mark the map of the area accordingly. I have attached a survey with the Givaudan cell highlighted but I am not sure where the gate is located.
